

`std::false_type`

```
graph BT; A[cudf::detail::is_relationally_comparable_impl< L, R, typename >] --> B[std::false_type];
```

The diagram illustrates an inheritance relationship. At the top is a white box with a black border, divided into three horizontal sections. The top section contains the text `std::false_type`, while the middle and bottom sections are empty. Below this box is a blue arrow pointing upwards. At the base of the arrow is a larger, gray box with a black border, also divided into three horizontal sections. The top section of this gray box contains the text `cudf::detail::is_relationally_comparable_impl< L, R, typename >`, while the middle and bottom sections are empty. The arrow points from the top section of the gray box to the bottom section of the white box, indicating that the gray box inherits from the white box.

`cudf::detail::is_relationally
_comparable_impl< L, R, typename >`
