

std::true\_type

```
classDiagram
    class std_true_type["std::true_type"]
    class cudf_is_device_span_supported_container["cudf::is_device_span_supported_container< rmm::device_vector< T > >"]
    cudf_is_device_span_supported_container --|> std_true_type
```

The diagram consists of two class boxes. The top box, representing `std::true_type`, is white with a black border and is divided into three horizontal sections. The bottom box, representing `cudf::is_device_span_supported_container`, is gray with a black border and is also divided into three horizontal sections. A blue arrow points from the top section of the gray box to the bottom section of the white box, indicating inheritance.

cudf::is\_device\_span  
\_supported\_container  
< rmm::device\_vector< T > >
