

std::true_type

The diagram illustrates a specialization of the std::true_type trait. It consists of two rectangular boxes. The top box, representing the base trait, is divided into three horizontal sections; the top section contains the text 'std::true_type'. The bottom box, representing the specialization, is a single solid gray rectangle containing the text 'cudf::is_host_span_supported_container < std::basic_string< T, std::char_traits< T >, Alloc > >'. A blue arrow points from the top edge of the bottom box to the bottom edge of the top box, indicating that the specialization inherits from the base trait.
